

Graphene & Related Materials (GRM-2014)

Workshop & Summer School

9th - 11th July, 2014

From fundamental properties to applications

An excellent opportunity to discuss with national and international experts on various fields in Graphene and other two-dimensional (2D) materials research.

An exciting program and the charms of this beautiful part of the country will combine to make this a successful and memorable event.

Invited Lecturers

Chris van Haesendonck
KU Leuven, Belgium

Seung Hyun Hur
University of Ulsan, Korea

Stephan Roche
Catalan Inst. of Nanosci. and Nanotech., Spain

Ümit Ertem
Ankara University, Turkey

Coşkun Kocabaş
Bilkent University, Turkey

Cem Sevik
Anadolu University, Turkey

Sefaattin Tongay
University of California, Berkeley, USA

The workshop will cover both theoretical and experimental aspects related to Graphene and other two-dimensional materials research in Physics, Chemistry and Engineering.
